

# Tap and Pay

Bright Sparks

Did you know that cash and coins aren't the only way to pay? You can tap your way around town using a debit card, your phone and even your watch which will spend your real money that your bank holds in an online account for you.

For example;

Sparkie currently has \$100 in an online account looked after by Greater Bank.

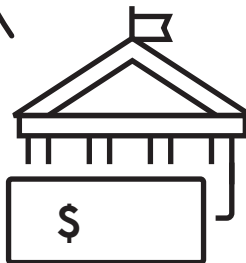

While out shopping Sparkie starts to feel a little peckish.

Using a Smartphone Sparkie is able to buy a drink and an apple.

The Smartphone will 'talk' to Sparkie's bank account and tell it to remove the money from his account that was used to pay for his drink and apple.

After a day out shopping how much does Sparkie have left in the online account?
